Gianfranco Benvenuto

Full Stack Web Developer

I am passionate about programming with which, through effort and perseverance, challenges or conflicts can be resolved. Being a Web Developer is more than a job, it is a passion for what I like to do. Always motivated to learn day-by-day since I consider that it is the only way to constantly improve myself. I feel very comfortable with the "learning by doing" philosophy.

Experiencia

PROJECT 1

Creation of an E-commerce with the PERN paradigm. (full stack developer position)

Participation in an agile development team with one-week sprints presenting to a Product Owner progress on the development of the e-commerce in question
Basic characteristics :
- CRUD of products, auth, catalog, checkout, etc.
- Payment gateway integration (PAYMENT MARKET)
- Sending emails (NODEMAILER)
- Administration of shopping cart, users

PROJECT 2

Creation of an app with the MERN paradigm and React Native. (full stack developer position)

Development of a virtual wallet with expo and mongoDB
Basic Features: User creation, money surcharge, transfers by cvu or by added contacts

About Me

With only 20 years I have learned several tools which had helped me to program decisively and fluently.

As for my experience in web development, i have come to master the Git version control system and I have projects carried out both on the front-end with React, Redux and Hooks and on the back-end, with Express, Node and PostgreSQL.

I am, too , familiar with the Scrum modality and I feel comfortable when it comes to teamwork. My sense of human relationships and my communication skills have been enriched by these experiences.

Skills

Css3   HTML5   React   Redux

Sass   Bootstrap   GitHub   Javascript

node Js   PostgreSQL   express

Education

Henry Bootcamp 2020/2021 +700hs
Full Stack Web Developer

- Fundamental : Javascript, estructura de datos,algoritmos,Big O , functional vs OOP

- Front-End : HTML DOM,CSS ,Webpack, React, State Management(Redux)

- Back-End : Node Js, Apis, Web server (Express), SQL, Postgres, Sequelize, Basic Testing,

- Agile methodologies : SCRUM
